

MAYANK GOYAL

Senior Data & AI Solutions Consultant

+91 96466-84712 | goyalmayank48@gmail.com | [linkedin.com/in/digimayank](https://www.linkedin.com/in/digimayank) | mayankgoyal.ai
Gurugram, India | Open to Remote India & Relocation (Bengaluru / Mumbai / Hyderabad / Pune / Dubai)

PROFESSIONAL SUMMARY

Senior Consultant with 5+ years architecting enterprise BI for a Fortune 100 FMCG portfolio across 60+ markets on a 300GB+ Azure data lake. Deep on Power BI, DAX, SSAS, and Azure Analysis Services — now shipping production Generative AI on Python, Anthropic Claude, LangChain, and Azure OpenAI for senior client engagements.

CORE SKILLS

Data & Analytics: Power BI · DAX · SQL · Teradata · MS SSAS · Azure Analysis Services · Tabular Editor · SSMS · Tabular Models · Semantic Layer · Data Modeling · Performance Tuning · ETL/ELT · Data Pipelines

GenAI & ML: Python · Anthropic Claude · OpenAI GPT · Large Language Models (LLMs) · LangChain · Retrieval-Augmented Generation (RAG) · Vector Databases (Pinecone, ChromaDB, FAISS) · Embeddings · Semantic Search · Prompt Engineering · AI Agents · Tool Use · LLM Evaluation · Streamlit · FastAPI · Hugging Face · Responsible AI

Cloud & DevOps: Microsoft Azure · Azure OpenAI · Azure AI Studio · Azure Data Lake · Azure DevOps · MSAL (Service Principal Auth) · Power BI REST API · Git · GitHub · CI/CD · MLOps · Docker · Microservices · API Development · Microsoft Power Automate

Consulting & Leadership: Solution Architecture · Stakeholder Management · Client Engagement · Cross-functional Team Leadership · Agile / Scrum Delivery · Technical Mentoring · POC to Production · Business Storytelling · AI Governance

FEATURED PROJECT

PowerBI Insight Co-pilot — Open-Source GenAI Project (*Jun 2026*)

Live: mayankgoyal.ai/projects/powerbi-copilot **Code:** github.com/digimayank/powerbi-insight-copilot

Production-grade natural language interface for Power BI semantic models. Users query in English; Anthropic Claude generates DAX, executes against the Power BI REST API, and returns narrative insights with source attribution — reducing analyst turnaround time on routine business queries by an estimated 60%.

- **Stack:** Python · Anthropic Claude SDK · LangChain patterns · Power BI REST API · Azure AD (MSAL service principal auth) · Streamlit · Streamlit Cloud
- **Architecture:** 3-stage orchestrator (natural language → DAX generation → execution → narration) with LLM-driven DAX self-correction, schema-aware prompting, conversation memory for follow-up queries, and production-ready error handling and retry logic
- **Differentiator:** Engineered for enterprise constraints — single semantic layer, service principal authentication, schema-bounded generation, and end-to-end traceability suitable for governed client environments

PROFESSIONAL EXPERIENCE

Accenture Solutions Pvt Ltd — Senior Analyst, Data & Analytics

Gurugram, India (Hybrid) | Jul 2024 - Present

- Architect BI infrastructure for a Fortune 100 FMCG client's multi-billion-dollar global product portfolio across 60+ markets — own the semantic layer on a 300GB+ Azure-hosted data lake; partner with senior client stakeholders to convert strategic decisions into measurable topline outcomes

- Engineer Azure Analysis Services tabular models on one of the largest production BI data lakes in the FMCG industry; implemented incremental refresh and partition strategies enabling sub-second query response at enterprise scale
- Coordinate a 40+ member cross-functional delivery team spanning data engineering, BI development, QA, and client stakeholders across 3 continents; established a daily delivery rhythm that reduced critical bug resolution time by 50%
- Lead technical mentorship for new joiners on advanced DAX, performance tuning, and semantic model architecture; built reusable internal frameworks adopted across multiple client engagements

PwC India — Associate (Power BI Consultant)

Gurugram, India (Remote) / Mar 2021 - Jul 2024

- Senior analyst on the Global Net Revenue Management (NRM) initiative for a leading Fortune 100 FMCG client — owned BI reporting infrastructure informing pricing, promotional, and product-mix decisions across the global portfolio
- Architected migration of 40+ business-critical dashboards from Tableau to Power BI; redesigned the semantic layer and DAX measure architecture, reducing report load latency by 75% on 300GB+ tabular models
- Translated complex C-suite business requirements into solution architectures spanning data modeling, integration patterns, and visualization workflows; partnered with clients on roadmaps, prioritization, and delivery sequencing
- Conducted 50+ technical interviews evaluating Power BI candidates and led onboarding of new team members through structured technical enablement programs

EDUCATION

Bachelor of Technology — Computer Science Engineering

Giani Zail Singh College of Engineering & Technology, Punjab Technical University, Bathinda / 2016 - 2020

CERTIFICATIONS

- **Microsoft Certified: Azure AI Engineer Associate (AI-102)** — In Progress, target Jul 2026
- **Analyzing and Visualizing Data with Microsoft Power BI** — Microsoft (Apr 2021)
- **Marketing Analytics** — Udacity (May 2020)
